PROFESSIONAL SUMMARY

Fullstack Developer specialized in CRM systems, automation, and business software, with hands-on experience delivering real-world solutions for logistics, banking, consulting, and institutional environments. Strong background in Odoo customization, React/TypeScript, Python/Django, .NET ecosystems, Docker deployments, and operational workflow automation.

EXPERIENCE

Odoo CRM Developer — Mudanzas Willy

Valencia, Spain | Feb 2026 - Present

- Built and customized a production CRM system using Odoo for a logistics and moving company.
- Automated quotation, contract generation, and operational workflows.
- Implemented PDF offer and contract generation systems.
- Developed duplicate lead detection, media uploads, and advanced lead management features.
- Added automated labor-hours estimation and operational planning logic.
- Integrated external web forms and improved business workflow organization.
- Deployed and maintained the platform on VPS infrastructure using Docker, PostgreSQL, and Nginx.
- Improved operational efficiency by adapting the CRM to real business processes.

Tech Stack: Odoo, Python, PostgreSQL, Docker, Nginx, VPS, JavaScript, Automation
